

Masoneilan™ 51/52/53 Series

Cylinder Actuator

Conversion Table

All the USCS values are converted to metric values using the following conversion factors:

USCS Unit	Conversion Factor	Metric Unit
in.	25.4	mm
lb.	0.4535924	kg
in ²	6.4516	cm ²
ft ³ /min	0.02831685	m ³ /min
gal/min	3.785412	L/min
lb/hr	0.4535924	kg/hr
psig	0.06894757	barg
ft lb	1.3558181	Nm
°F	5/9 (°F-32)	°C

Note: Multiply USCS value with conversion factor to get metric value.

Features

Masoneilan Model 51/52/53 pneumatic cylinder actuator provides high thrust and dynamic stiffness to meet a variety of throttling control and on/off applications. Some of the key cylinder actuator features include:

Rugged Construction

Heavy internal guiding and support provides proper alignment of the dynamic components, delivering a rugged construction suited for the most demanding valve actuation requirements.

Application Versatility

Standard construction options include double-acting without springs, as well as heavy mechanical spring-return for both air-to-extend and air-to-retract operation. Air volume in the cylinder is reduced in each design, providing high dynamic stiffness and improving speed of response.

Safety and Ease of Assembly

The standard spring-return design includes separate spring cartridge subassemblies, which allow for safe pre-compression of the springs prior to final assembly into the actuator cylinder. The spring cartridge subassembly is also fully field reversible, which helps to reduce plant inventory.

Long Life Cycle

Heavy guiding of the actuator stem results in excellent mechanical alignment of the key components, thus minimizing dynamic seal and sliding surface wear. This also helps to reduce overall operating friction, which enhances throttling control performance.

Optional Accessories

Fail action mode for the double-acting configuration without springs can be provided using an integral volume tank design. There is also an optional manual override available for all actuator sizes. Standard materials are the same for all actuator sizes. Optional handwheel/handjack assemblies provide manual override in case of air failure.

Ease of Maintenance

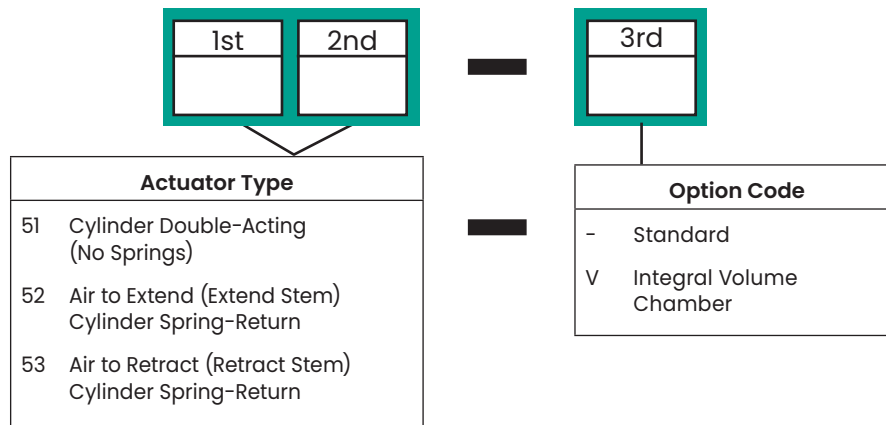

Modular construction of the cylinder and spring cartridge design provides an assembly that is both easy and safe to maintain. The actuator piston is located in a separate cylinder chamber, which allows for simple dynamic seal replacement.

PED Compliance

The Model 51/52/53 conforms to European Pressure Equipment Directive (PED) requirements.

Please consult your local Baker Hughes sales representative for any additional product information.

Numbering System

1. Adjustable stopper is available only for option without volume chamber.

Note: Consult factory for range of adjustment for actuators with travel greater than 6 inch (152.4mm).

Adjustable travel stops are not available with volume chamber or hydraulic handjack.

9	Rod scraper	Nitrile (Buna-N)
10	Center bolt	Alloy Steel
12	Spring lock washer	Carbon Steel (Zinc-Plated with Black Oxide Finish)
13	Hexagon nut	Carbon Steel (Zinc-Plated with Black Oxide Finish)
14	Split clamp	Carbon Steel (Black Oxide Finish)
15	Indicator arm	Carbon Steel
16	Hexagon bolt	Carbon Steel (Black Oxide Finish)
17	Spring lock washer	Carbon Steel (Zinc-Plated with Black Oxide Finish)
18	Indicator plate	Stainless Steel
19	Indicator plate screw	Stainless Steel
20	Separator plate	Ductile Iron
25	Upper spring button	Cast Iron
26	Spring	Alloy Steel
27	Spring tube	Carbon Steel
28	Guide bushing	PTFE/Steel
29	Compression bolt	Carbon Steel
30	Lower spring button	Ductile Iron
31	Thrust bearing	Chrome-Alloy Steel
32	Compression nut	Stainless Steel
34	Set screw	Stainless Steel
35	Exhaust pipe	Carbon Steel (Zinc-Plated)
36	Plug	Carbon Steel (Zinc-Plated)
37	CM Handwheel Assembly	Steel
	DM Handwheel Assembly	Steel
38	O-ring	Nitrile (Buna-N)

Optional Constructions

Low-Temperature Service: Suitable for low ambient temperature

Ref. No.	Description	Low Temp. Construction -50°F to +181°F (-46°C to +83°C)
1	Yoke	Low Carbon Steel
4	O-ring	Nitrile – Low Temperature
2, 3, 6, 21, 51DP, 55DP, 56DP	Top plate, Piston, Cylinder, Volume Chamber	Low Carbon Steel
8	O-ring	Nitrile – Low Temperature
9	Rod scraper	Nitrile – Low Temperature
10, 11	Center Bolt	Stainless Steel
13	Hex Nut	Stainless Steel
20, 49DP	Separator plate	Low Carbon Steel
4, 8, 9, 38, 136, 54DP, 103	O-ring	Nitrile – Low Temperature
9	Rock Scraper	Nitrile – Low Temperature

Ref. No.	Description	Low Temp. Construction -58°F to +181°F (-50°C to +83°C)
1	Yoke	Low Carbon Steel (Stainless Steel for size 32)
4	O-ring	Nitrile – Low Temperature
2, 3, 6, 21, 51DP, 55DP, 56DP	Top plate, Piston, Cylinder, Volume Chamber	Stainless Steel
8	O-ring	Nitrile – Low Temperature
9	Rod scraper	Nitrile – Low Temperature
10, 11	Center Bolt	Stainless Steel
13	Hex Nut	Stainless Steel
20	Separator plate	Low Carbon Steel
49DP	Separator plate	Stainless Steel
4, 8, 9, 38, 136, 54DP, 103	O-ring	Nitrile – Low Temperature
9	Rock Scraper	Nitrile – Low Temperature

Note: The above indicates only those parts that change material for low temperature service. All other parts remain the same as standard.

High-Temperature Service: Suitable for high ambient temperature

Ref. No.	Description	High Temperature Construction -4°F to +212°F (-20°C to +100°)
4	O-ring	Nitrile – High Temperature
8	O-ring	Nitrile – High Temperature
38	O-ring	Nitrile – High Temperature

Note: The above indicates only those parts that change material for high temperature service. All other parts remain the same as standard.

Integral Volume Tanks

The Model 51 Double-Acting Actuator without springs is also available with integral volume tanks for emergency fail action. Key advantages of the integrated volume tank design include sealing integrity and a reduced number of components. Standard sizes are shown in the chart below. Consult the factory for proper selection to meet the specific application requirements.

Actuator Size	Volume Tank Size	
	Gallons (US)	Liters
12	4.3	16.2
16	6.5	24.4
20	9.8	37.1

Adjustable Travel Stops

Item No.	Part Name	STD Material (PED)
100-1	Top plate	Carbon steel
100-2	Stopper boss	ASTM A36
101	Stop bolt	Stainless steel
103	O-ring	Nitrile (Buna-N)
104	Hexagon nut	Carbon steel
106	Hexagon bolt	Stainless steel
107	Hexagon nut	Carbon steel
109-1	Piston	ASTM A105 Per PMA MN0023
109-2a	Piston rod	17-4 PH Stainless steel
109-2b	Piston rod (Handwheel)	17-4 PH Stainless Steel
110	Stop collar	Carbon steel

Stainless Steel Bolting

Item No.	Part Name	STD Material
10 & 11	Center bolt	Stainless steel
13	Hexagon nut	Stainless steel
16	Hexagon bolt	Stainless steel
133	Hexagon bolt	Stainless steel
134	Hexagon nut	Stainless steel
135	Stud bolt	Stainless steel

Steel Yoke

Item No.	Part Name	STD Material
1	Yoke	Carbon steel LCC
